Profile

Motivated computer science student with a strong foundation in ASP.NET, web development, and .NET technologies. Proficient in C#, MVC architecture, and database systems. Passionate about building real-world applications and learning modern tech stacks. Seeking to contribute to impactful projects within a dynamic development team.

Skills

Languages
- C#
- PHP
- Java
- C++
- HTML
- JavaScript
- CSS

Frameworks & Tools
- ASP.NET MVC
- ASP.NET API
- EF Core
- Bootstrap

Databases
- SQL
- SQLite
- SQL Databases

Concepts
- OOP
- Data Structures
- Repository Design Pattern
- Unit of Work
- Onion Architecture

Certificates

Cisco Networking Certifications (CCNA)
- **CCNA: Introduction to Networks**
- **CCNA: Switching, Routing, and Wireless Essentials**
- **CCNA: Enterprise Networking, Security, and Automation**

Programming and Web Development Courses
- **Programming Fundamentals Diploma   (Route)**
- **Web Development using .NET -120 Hours   (ITI)**
- **Back-End Diploma using ASP.NET   (Route)**

Projects

E-Commerce Project (Full Stack Developer)
ITI Training Program | Cairo, Egypt January 2023 – Present
- Developed a full-stack e-commerce app using ASP.NET, EF Core, and SQL databases.
- Integrated front-end (HTML, CSS, JavaScript) with back-end services for a seamless user experience.
- Optimized performance with caching and query optimizations.

E-Commerce Project (Full Stack Developer)

Faculty of Computer and Artificial Intelligence | Banha, Egypt October 2022 – December 2022

- Built an e-commerce site using HTML, Java, and PHP.
- Implemented features like user authentication, product management, and order tracking.
- Focused on performance and clean, user-friendly design.

E-Commerce Website using ASP.NET MVC (Full Stack Developer)

Route Training Program | Cairo, Egypt , January 2025 – March 2025

- Developed a complete e-commerce website using **ASP.NET MVC**, **Entity Framework**, and **SQL Server**.
- Followed **MVC architecture**, applied **Repository Pattern** and **Unit of Work** for clean code and scalability.
- Implemented admin and customer interfaces, product catalog, and secure login system.

Talabat-like Delivery App using ASP.NET Web API (Back End Developer)

Personal Project | Cairo, Egypt, March 2025 – May 2025

- Built a back-end system for a food delivery platform similar to **Talabat** using **ASP.NET Web API**.
- Designed and implemented RESTful APIs for authentication, restaurant menus, and order tracking.
- Focused on performance, security, and scalable architecture using **Onion Architecture** and **EF Core**.
